Bergeron, M. d., Ouellette, M. and Roy, P. H.
Bergeron, M. d., Ouellette, M. and Roy, P. H.
Species specific and universal DNA probes and amplification primers
to rapidly detect and identify common bacterial pathogens and
associated antiblotic resistance genes from clinical specimens for
routine diagnosis in microbiology laboratories
Patent: US 6001564-A 136 14-DEC-1999;
Goodfellow,P.N.
Methods for identifying a mutation in a gene of interest without a
phenotypic guide
Patent: US 5994075-A 14 30-NOV-1999;
Location/Qualifiers
                                                                                                                                                                                                                                                                                                                                                                                                                                   1 (bases 1 to 18)

Bunenfeld,A., Ousella,J.F., Breakefield,X.O. and Slaugenhaupt,S.
Use of genetic markers to diagnose familial dysautonomia
Patent: US 5998133_A 33 07-DEC-1999;
                                                                                                                                           Length 18;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Length 18;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                        PAT 20-JUN-2002
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           1 (bases 1 to 18)
Xu,M., Qiu,G. and Humphreys,R.
MHC class II antigen presenting cells containing oligonucleotides
which inhibit I protein expression
Patent: US 6368855-A 18 09-APR-2002;
Unclassified.

1 (bases 1 to 18)

Brzostowicz,P.C. and Rouviere,P.E.
Genes and enzymes for the production of adipic acid intermediates
Patent: US 6365376-A 39 02-APR-2002;
Location/Qualifiers
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Gaps
                                                                                                                                                                                                                                                                     Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           1 (bases 1 to 18)

Pi-ta gene conferring fungal disease resistance to plants

Patent: US 6479731-A 42 12-NOV-2002;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                          1 (bases 1 to 18)
Cohen, D., Chumakov, I. and Blumenfeld, M.
Biallelic markers for use in constructing a high density
disequilibrium map of the human genome
Patent: US 637751-A 5796 25-MAR-2003;
Location/Qualifiers
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       1 (bases 1 to 18)
